SUMMARY

I'm a Unity Developer with more than seven years of experience in creating games and applications for Windows, Android, VR and AR. I have skills in Unity, C#, C++, Blender and other software. I have a master's degree in computer engineering with a major in artificial intelligence and several awards in robotic and game development competitions. I like video games and I would love to join a game company. I'm enthusiastic to develop video games and work on exciting projects and make a great time for gamers.

Please feel free to check my web page to see some of my projects.

EXPERIENCE

September 2023 - February 2025 (1 year 6 months)

[Enlightened Robot Entertainment](#) · Contract - *Technical animator*

- Animate the environmental objects related to the stage and the background of the "Naser: son of man".
